

## Vaillant ecoTEC Plus System Boiler Ranges 612, 615, 618, 624, 630 and 637

System boilers are typically used in sealed systems very often (but not exclusively) with Sealed (Megaflow) cylinders that run on mains pressure and with no tanks. Vaillant ecoTEC plus system boilers provide simple installation and unrivalled flexibility for the engineer within this environment.

- The small unit sizing offers excellent siting versatility and easy installation and, with the multi-directional push flue system, they offer even greater installation flexibility.
- Being condensing boilers they provide a SEDBUK efficiency of 89.2% (SAP 2009) as their unique stainless steel heat exchangers allow more heat to be extracted by recapturing otherwise lost heat,
- They offer ease of usage with the new Built-in status / diagnostic display.
- From an engineer's point of view, the side panels are removable and access to all the internal components ensure that is one of the most popular of the boilers on the market to carry out any repair work on.
- Tried and tested manufacturing methods and retained compact dimensions, as well as low lift weight, means reassured continuity with the previous ecoTEC range
- All ecoTEC Plus boilers installed by Plumbing Wise come with a free 7 year warranty.
- These boilers are registered with the Energy Saving Trust.

DIMENSIONS	H: 720mm x W: 440mm x D: 335mm
SEDBUK	Band 'A' rated.
OUTPUT RANGE	ecoTEC plus 612 - 4.9 - 12.0kW 40,000 BTU/hr ecoTEC plus 615 - 4.9 - 15.0kW 50,000 BTU/hr ecoTEC plus 618 - 6.7 - 18.0kW 60,000 BTU/hr ecoTEC plus 624 - 8.7 - 24.0kW 80,000 BTU/hr ecoTEC plus 630 - 10.0 - 30.0kW 100,000 BTU/hr ecoTEC plus 637 - 12.0 - 37.0kW 130,000 BTU/hr
DHW FLOW RATE	N/A
WARRANTY	10 years
