

Vaillant ecoTEC Pro Combination Boiler Ranges 24 – 28kw

The ecoTEC pro high efficiency combination boilers are market leaders for both flats and houses, with the ecoTEC Pro 24 ideally suited to properties having only one bathroom.

- The Vaillant AquaComfort System enables instantaneous hot water to be provided at a contact temperature.
- The small unit sizing offers excellent siting versatility and easy installation and, with the multi-directional push flue system, they offer even greater installation flexibility.
- Being condensing boilers they provide a SEDBUK efficiency of 89.2% (SAP 2009) as their unique stainless steel heat exchangers allow more heat to be extracted by recapturing otherwise lost heat.
- They offer ease of usage with the new Built-in status / diagnostic display, and both the central heating and hot water can be controlled. Timing controls can be mechanical or digital depending on the user's preference.
- From an engineer's point of view, the side panels are removable and access to all the internal components ensure that is one of the most popular of the boilers on the market to carry out any repair work on.
- All ecoTEC Pro boilers installed by Plumbing Wise come with a free 5 year warranty.
- These boilers are registered with the Energy Saving Trust

DIMENSIONS	H: 720mm x W: 440mm x D: 335mm
SEDBUK	Band 'A' rated.
OUTPUT RANGE	ecoTEC pro 24 6.7 – 19kw 80,000 BTU/hr ecoTEC pro 28 9 – 24kw and has powerful DHW performance with an AquaComfort system that delivers instantaneous hot water at constant temperatures. 110,000 BTU/hr
DHW FLOW RATE	ecoTEC Pro 24 9.4 litres / min ecoTEC Pro 28 11.5 litres/min
WARRANTY	7 years
